Junior Web Developer

I am an aspiring web developer and have recently completed a level 5 NVQ in web app development with Code Institute and am currently looking for my first role in the industry. After independently studying coding through Codecademy and finding it engaging and fulfilling I decided in 2021 to pursue web development as a career. I have since completed several projects both front end and full stack which can be viewed via my portfolio website. With almost 8 years of experience in specialised, customer facing roles in retail environments I am highly capable with regards to communication and working as part of a team. In addition to my understanding of programming languages and frameworks I am proficient with Adobe Photoshop and XD and have aided other developers with overall website design and graphics for their projects.

Technical Skill Set

Technologies

- JavaScript
- HTML5
- CSS3
- Python

Databases

- MongoDB
- MySQL

Frameworks / Libraries

- Django
- Flask
- jQuery
- Materialize
- Bootstrap

Version Control

- Git
- Github

Professional Experience

Greenlawns Kennels

2020

Web & Graphic Designer

It was my responsibility to create wireframes, both low-fidelity and high-fidelity and to create any required graphical elements for the site. These elements included backgrounds, logos and images. Throughout the project I worked directly with the web developer, consulting on the designs, graphics, colours and layouts.

- Design page layouts, colour schemes and use of graphics.
- Design/create all custom graphics and help source 3rd party icons and images.
- Edit images provided by the client for use within the site.
- Consulting with the lead web developer.

Technologies

- Adobe XD.
- Adobe Photoshop.

Waitrose and Partners

2015 – 2021

Fruit, Veg and Horticulture Specialist

As a specialist my role revolved around the management, training and promotion of the fresh produce sections of the store. This involved customer service and advice, partner (employee) training, stock management and conducting quality

and legality checks.

In this role I would engage with customers in order to improve their retail experience and to promote the company's impressive range and quality of products through use of specialist knowledge and customer service skills. I would also be responsible for the training of new partners in company procedures and processes, customer service skills and product knowledge.

- Customer Service.
- Self learning/specialist knowledge. Expand and maintain product and service knowledge.
- Stock management. Checking correct stock values, sales numbers and adjusting demand via digital systems.
- Partner training.

Ceritech Audio **AV Sales Consultant**

2013 – 2015

In this role I would design and sell custom audiovisual solutions to customers based on their individual requirements. These solutions would range from high end Hi-Fi and home cinema systems to multiroom audio networks and would often involve detailed product demonstrations and home installation. As part of these tasks I was required to have and maintain a large amount of detailed product knowledge and a high level of customer service skills.

- Create audiovisual solutions for customers based on requirement and budget.
- Installation, configuration and demonstration of digital systems for clients.
- Work with others in the team. Draw upon the expertise of other team members where relevant to ensure customers receive an ideal outcome.
- Meet and learn from suppliers to expand both specific product knowledge and knowledge of industry standards.

Education and Training
